

## Add animations

More information on how to use Qlik can be found at [Tutorials - Qlik Sense](#) and at [Qlik Sense tutorials on YouTube](#).

### Add animations to a story

The Data Exchange allows you to Add animations to your story by using the **Effects library**. These visual effects can only be used on bar charts, line charts and pie charts.

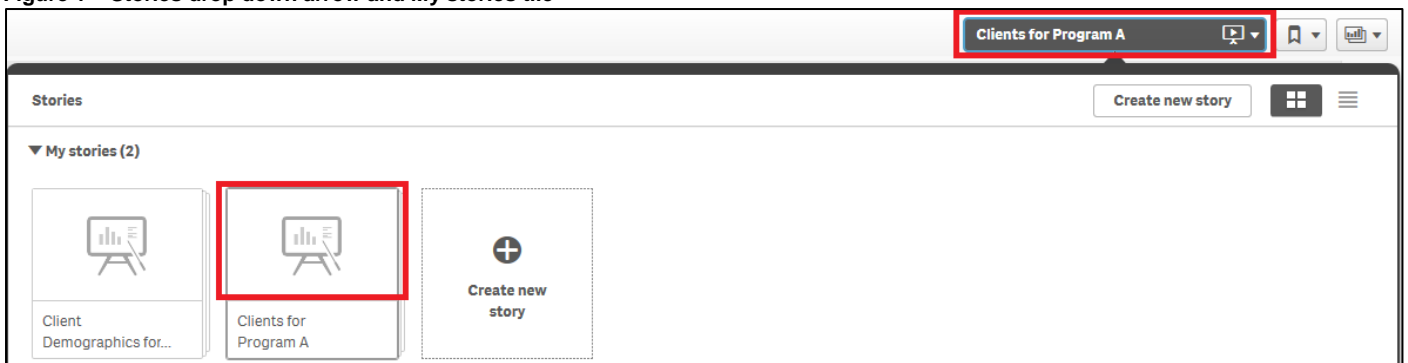

Table 1 – Effects library navigation items

| Item  | Description  |
|---|--|
|    | Select the <b>Highest value</b> icon effect will make the highest value stand out by adding a label to the highest value and dimming the other values. For visualizations with grouped values, the highest value in each group will be highlighted   |
|  | Select the <b>Lowest value</b> icon effect will make the lowest value stand out by adding a label to the lowest value and dimming the other values. For visualizations with grouped values, the lowest value in each group will be highlighted.  |
|  | Select the <b>Any value</b> icon effect will make a value, that you select manually, stand out by adding a label to the selected value and dimming the other values. For visualizations with grouped values, you can choose to highlight either a measure or a dimension. The selected measure or dimension will be highlighted in all the groups where it occurs. |
|  | Select to <b>replace</b> the image with another snapshot item in your Stories library.   |
|  | Select to <b>edit</b> the image.   |
|  | Select <b>lock</b> to prevent any changes being made to the snapshot.  |
|  | Select to <b>go to</b> the originating sheet source of the snapshot.   |
|  | Select to <b>return</b> to the Story that you are creating.  |

Access the required report and select . The **Stories** pop up box will display.

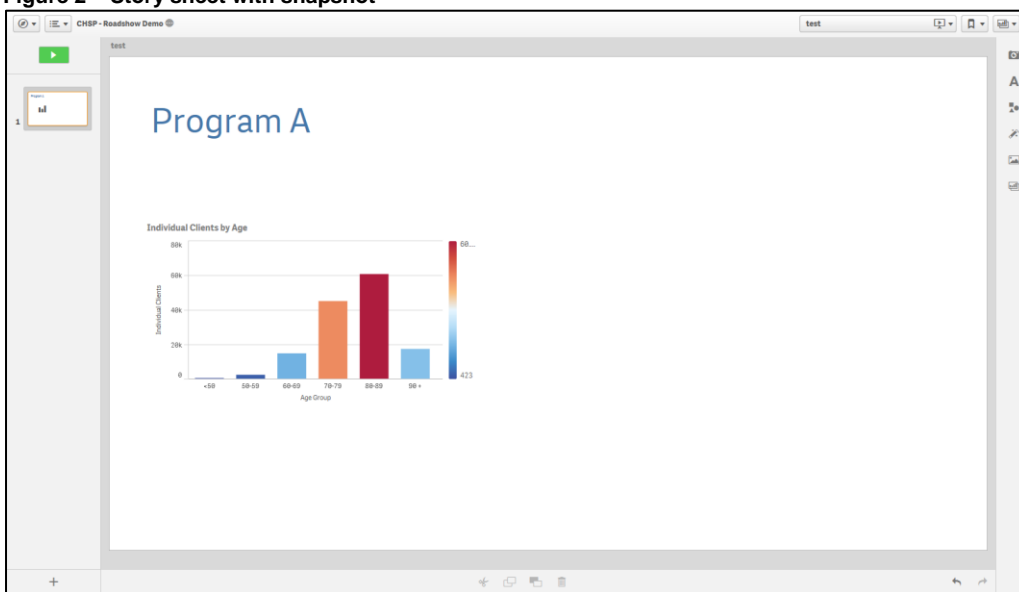

Access the required **Stories** tile.

Figure 1 – Stories drop down arrow and My stories tile

The **Story** page will display.

Figure 2 – Story sheet with snapshot

Select the  icon on the right of the Story page.

The **Effects library** pop up box will display.

Figure 3 – Effects library pop up box

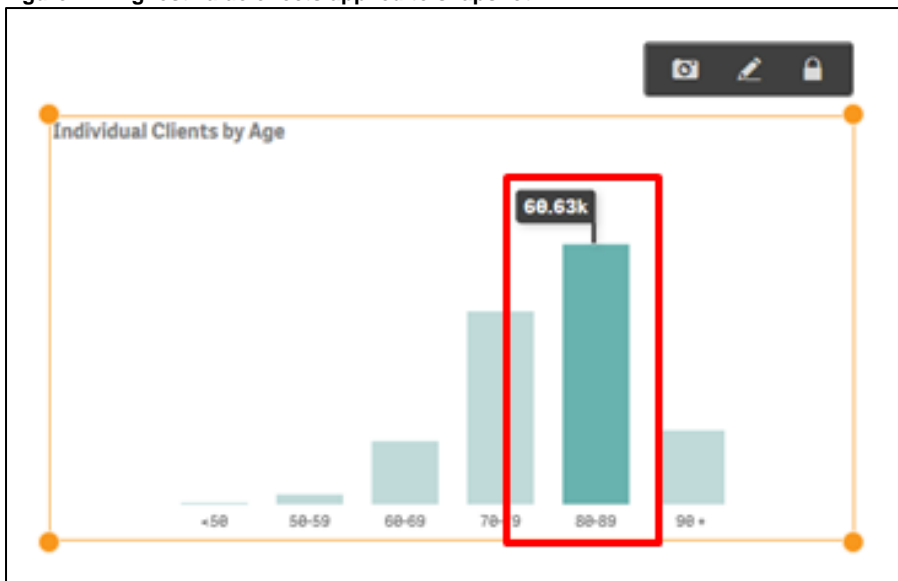

Click and drag the selected effect onto the snapshot.

The snapshot will display with the **effect** applied.

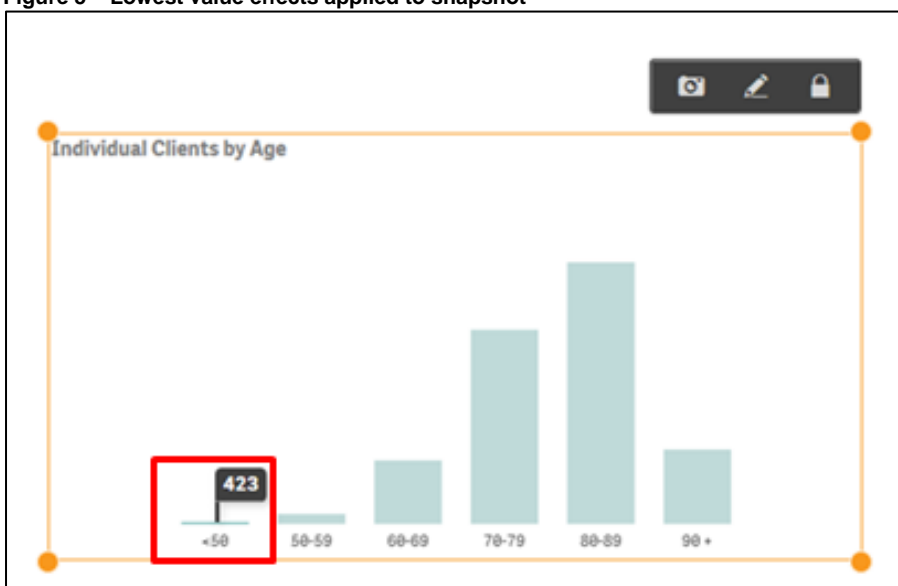

- The **Highest value** will apply a highlight and label to the column of the graph with the highest value and dim the other values.

Figure 4 – Highest value effects applied to snapshot

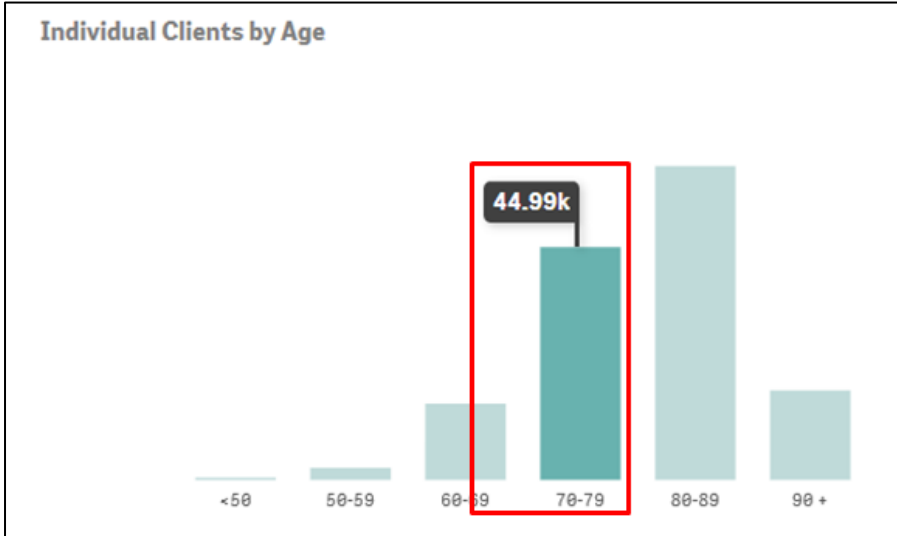

- The **Lowest value** will apply a highlight and label to the column of the graph with the lowest value and dim the other values.

Figure 5 – Lowest value effects applied to snapshot

- The **Any value** will apply a highlight and label to the selected column of the graph and dim the other values.

Figure 6 – Any value effects applied to snapshot

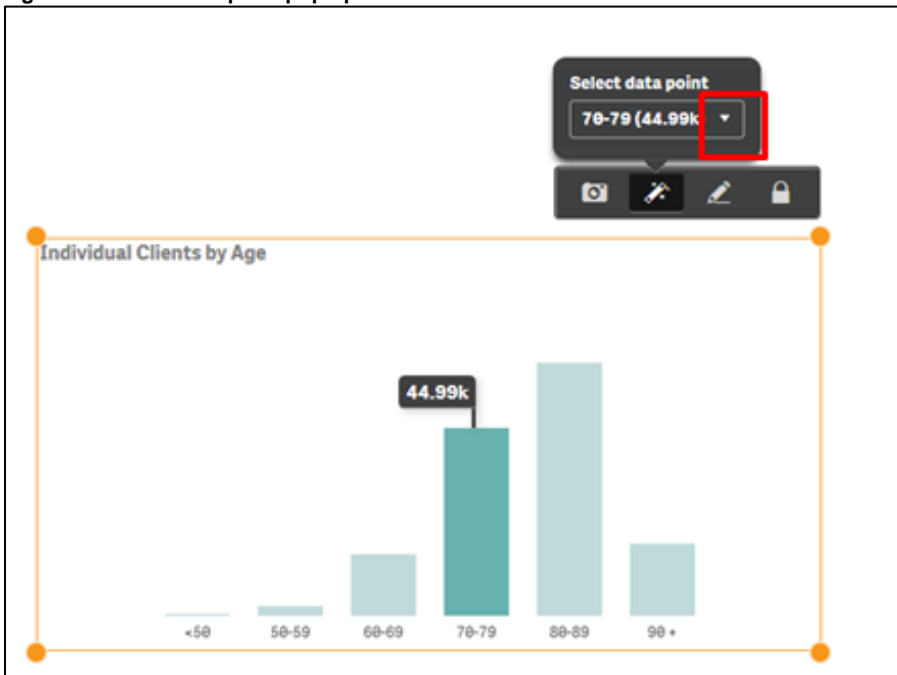

Click on the image to change the data item highlighted.

The **Select data point** pop up box will display.

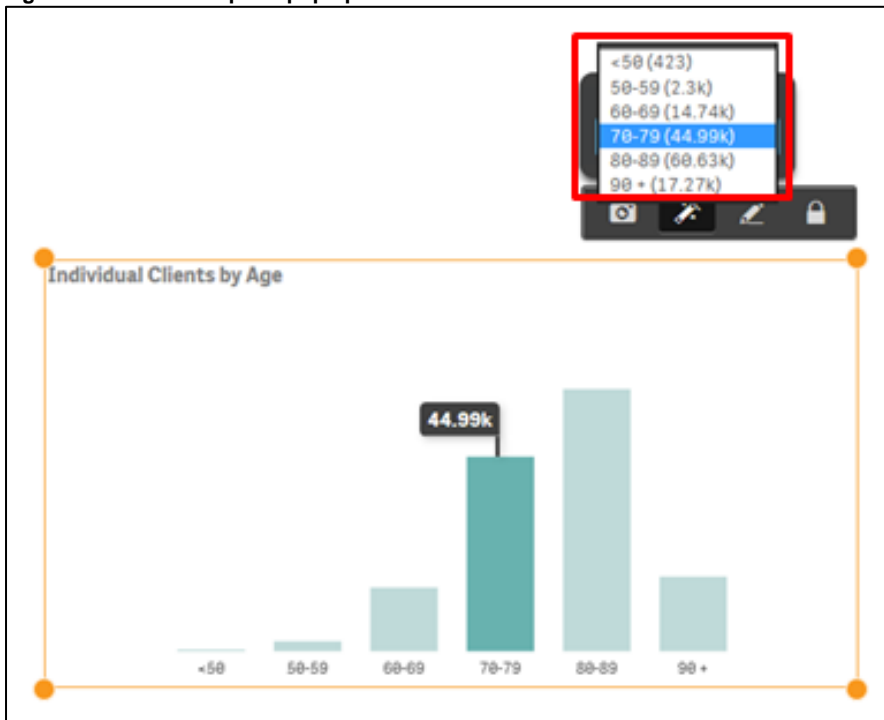

Select the drop down arrow in the **Select data point** pop up box to change the value selection.

Figure 7 – Select data point pop up box

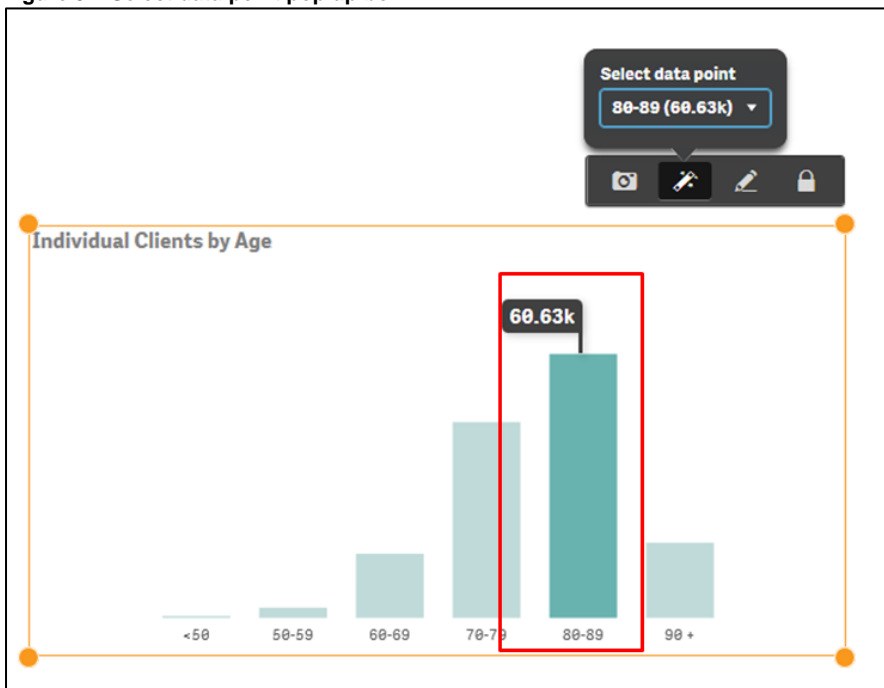

A **pop up** box will display with the items available in the image that can be selected.

Figure 8 – Select data point pop up box

Select the **required data point** item, and the item will automatically update.
