

Organisation overview

Standard report – available to all organisations

This report provides a one-stop view of an organisation's service delivery over time. You will only see the information submitted by your organisation, or organisations with which you have a 'handshake' arrangement.

By using the reporting filters, the report will display information on client types and demographics, outlets, services types, and patterns of service delivery.

Unique features:

- Shows delivery partner data – where 'handshake' agreements are in place
- Provides support person data (as separate from clients).

Key questions:

Examples of possible analysis areas (questions the report can answer)

- What program activities do we deliver? From which outlets? For each activity delivered, what were the total number of cases, sessions, individual/group clients and support persons?
- Who are our clients and why do they seek our services? Were they referred to us? Are they part of a priority group for this program?
- Have we recorded key client demographic details? Do these correspond to the target groups for our program?
- When filtering to show individual and group clients, what does this tell us about our client group? Do we have higher or lower numbers than expected?
- What outlets do we have and who uses them? Which program activities are delivered at those outlets? What could the reason be for variations in client numbers or activity levels?
- Does the data suggest there may be different practises at different outlets?
- How many sessions have we delivered over all? How many sessions do clients attend, on average? How many sessions and clients are there for each case, on average?
- What does this overview of our organisation tell us? Have there been changes over time? Do we need to make adjustments to our service delivery model?

Main filters:

- Reporting period
- Client type
- Program activity
- Delivery organisation / Outlets
